**please refer to our price list*

What does my commercial needs to be turned into a campervan?

Very little! A plywood floor with a commercial grade vinyl covering needs to be permanently installed into your Ducato. Also 2 RHS bars (above the wheel arches) should stay permanently inside, for quicker conversion progress.

What tools do I need for installation?

You only need two spanners, screw driver and one allen key- that's it!

Which fridges do fit into this layout?

Several top loader cooler, fridges or fridge/freezers can be used in this layout, for example:

Waeco: CF40, CF40 AC Verb, CDF35, CDF45

Engel: MT27F, MT35FP (without the handles)

How heavy in weight are the furnitures?

The furnitures, including all cabinets, empty tanks, bed and mattress do weight just under 90kg.

However, this does not include the fridge, stove or safe.

What do I do with the furnitures when not installed?

They are so practical, that you can use the furnitures also at home or store in the rumpus room, garage or workshop. The cabinets are on caster wheels and easy to move around on flat surface. Ideal they are covered and the mattress is stored off the ground.

Buy a *Vacanza* layout

*The production time of the *Vacanza* layout is one week after you placed your order. If you do request first installation and finishes (unless you can DIY)- we need your van for 1 day at our work shop in Geebung, please call us under **0401 797179** to book in.*
